

S-101 Trial Data Sets

Release 2.0

4th March 2022

Release 2.0 –Improvements and bug fixes based off user feedback

Following improvements to our production flowline we are now able to provide updated S-101 trial data sets (v2.0). The new data sets provide ENC updates to the base data, data in an S-100 exchange set format compliant with S-100 edition 5.0 and includes additional improvements and fixes based on user feedback.

Improvements

- All ENCs now have grouped soundings within them.
- ENC update files are now included with a notepad document describing the changes.
- S-101 ENC base data is now available in an S-100 exchange set.

Fixes

- CATALOG files have been amended to agree with the latest S-101 Product Specification (v1.0)

The coverage and underlying data of Release 2.0 has remained the same as Release 1.0

We are constantly working on improving the experience and quality of our ADMIRALTY S-100 trial data sets and we'd love to hear from you. If you have any comments on these new datasets please send your feedback to products.feedback@ukho.gov.uk.
